

Voice over IP, commonly known as VoIP, is the way of the future. It allows you to make cheap, and sometimes free phone calls to people around the world.

Securitech Solutions are able to design and install the latest quality VoIP telephone solutions for your organisation using recognised brands such as Asterisk, Epygi, SNOM, Aastra and Polycom.

Our tailored systems offer a comprehensive range of features and functionality at an affordable price.

We are able to install and configure the entire system for you including establishing an account with a quality VoIP provider.

We have found that the savings that our customers make on their calls and line rental will pay for the new hardware investment within months rather than years.

#### System features include:

- \* Choice of handsets (DECT, executive display and conference options)
- \* Integration of legacy PSTN/ISDN lines
- \* Rich PBX features (auto-attendant / IVR, music on hold, ring groups, diversion and caller ID).
- \* Unified messaging (voicemail-to-email and fax-to-email PDF)
- \* Conference room facilities
